# IntelliAg<sup>®</sup> ISO<sub>6</sub><sup>™</sup> has received UT 2.0 certification from AEF

The IntelliAg<sup>®</sup> ISO<sub>6</sub><sup>™</sup> monitoring and control system for air seeders and planters is now AEF certified as UT 2.0 compliant. This means that implements controlled by ISO6 will function effectively with any AEF certified Universal Terminal (UT). Select UTs from John Deere, CNH, CCI, Kverneland and many others are currently certified.

## The IntelliAg ISO<sub>6</sub> System Offers:

- ISO-compliance to reduce the number of UTs in the cab to streamline operation
- Modern interface that is intuitive and easy-to use for virtually all operators
- Integrated features such as hydraulics control, virtual section switches and advanced seed data
- Modular system approach to accommodate multiple machine models
