

INTELLIAG™ *ISO₆* SPREADER MODULE

IntelliAg™ *ISO₆* Spreader Module with Variable Rate Technology

DICKEY-john's IntelliAg™ *ISO₆* Spreader Module is a complete monitor and control system for applying granular products in a wide variety of applications. This fully ISObus compatible module will plug and play with most tractor brands with less harnessing and lower up-front cost. The module can be installed on self-propelled, pull-type or mounted spinner spreaders to provide growers with the ability to control belt speed and spinner rpm automatically, for accurate product placement. The streamlined user interface allows growers to be able to set up and make changes to the system with minimal effort. Simple operation allows growers to spend more time spreading and reduces downtime.

Features and Benefits

- ISOBUS plug-and-play ready
- ISO₆ open or closed loop control system
- Up to 3 PWM channels
- Automatic section control
- Variable Rate Ready
- As applied maps and documentation
- Compatible with most brands of displays

Backed by the power of DICKEY-john:
